THEP SIAM COMPANY LIMITED

It all started from June 15th, 1972. Under the direction of Mr. Suchin Ratanachaithong, Economic Chemical Company Ltd. began production of 'Bat' brand fertilizers and agricultural chemicals for the local market. Mr. Suchin realized that with the growth in the agricultural sector in Thailand, demand for high quality and technology driven chemicals will also grow. He also saw the growth of imported chemicals and understands the dangers associated with free movements of dangerous chemicals which can be good for short term gains but will be hazardous for Thailand as a country in the years to come.

His love for the safety and wellbeing of Thailand summarizes what we believe in and what we have achieved to this day. This belief is enhanced by the addition of Montedison. An Italian high quality chemical manufacturer. The collaboration in production brought Thép Siam Co., Ltd. into existence. Their safe and high quality chemical manufacturing technology propelled us towards higher sales volume and presence in the market.

In 2003, Mr. Phanit Ratanachaithong took over the leadership with the same values and principles. The constant rejuvenation of talent and creativity is continued by Dr. Widodo and Miss Meivy Ratanachaithong.

02

MANAGEMENT STRATEGY

Our main focus is based on the SSH&E principle. This commitment is aimed at streamlining all our employees and production procedures towards one single objective.

SAFETY :

Technologically advance procedures, Processes and equipments that ensures our workers, users and public safety.

SECURITY :

Credibility against profitability.
Technological prowess to ensure quality.
Confidentiality of customers' information and data.

HEALTH :

Wellbeing of our workers, users and public as the foremost priority

ENVIRONMENT :

Ensuring our products are environmentally friendly but effective in meeting the needs of our customers.

"Our expertise and flexibility in production techniques ensures the sustainability of our clients business potentials"

“ Profits made today although within the legal framework, do not ensure the future of our children’s clean and safe living environment. Only our high moral standards stands in between them. ”

STANDARD & CERTIFICATES

Our strong commitment to constantly improve our production standards is proven by the internationally recognized accreditation and credentials.

- Our production plant is ISO 9001 qualified.
- All our products are also FDA certified.
- GMP certification is in the final stages.

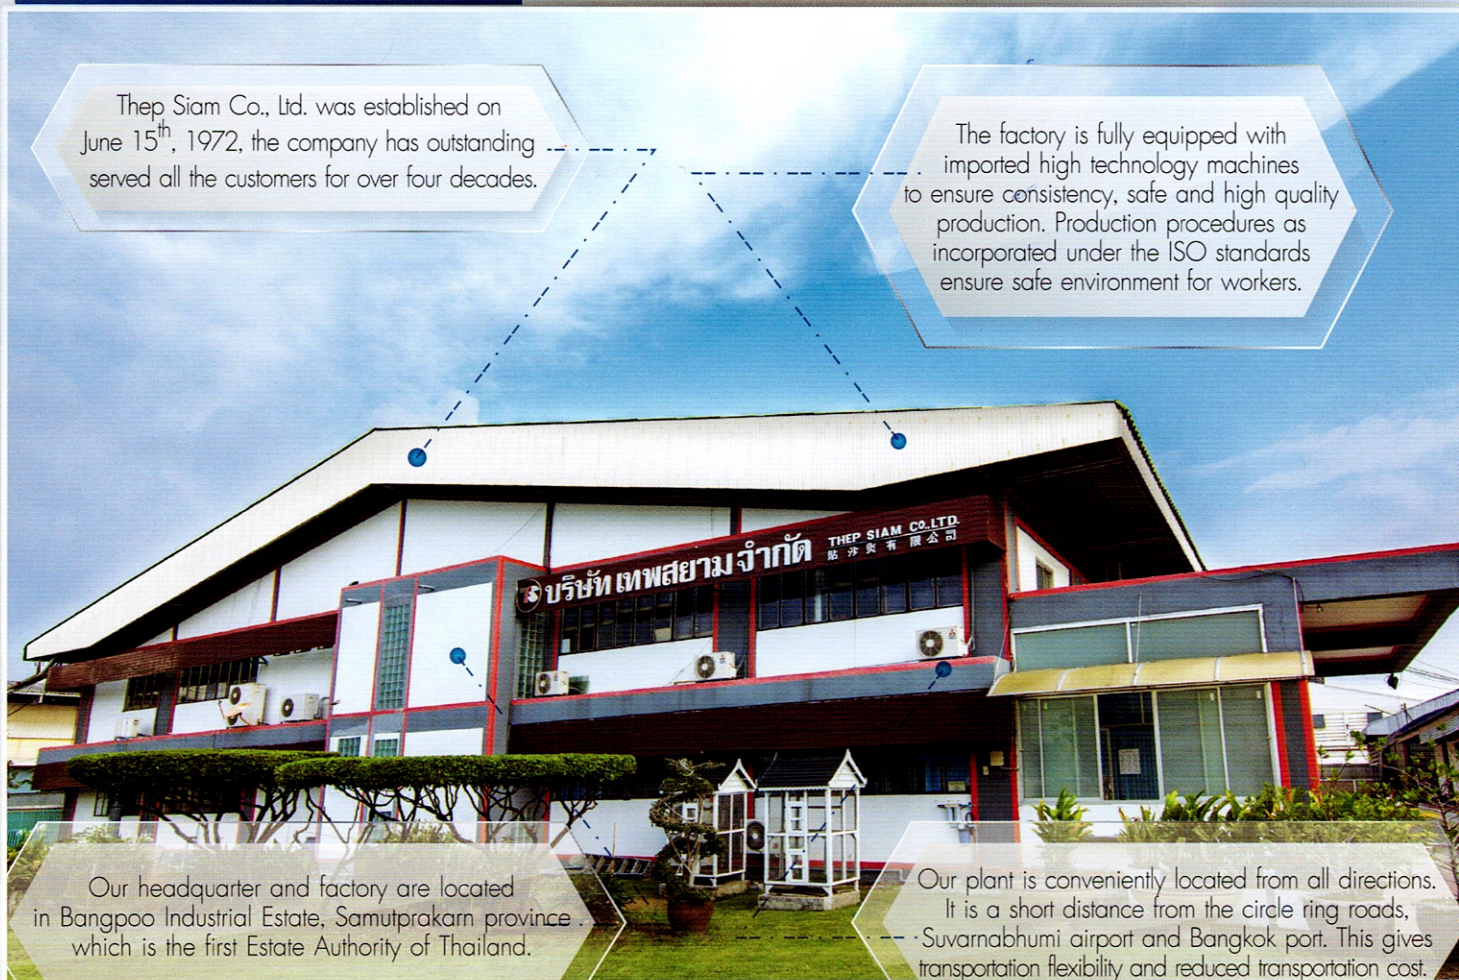

COMPANY INFORMATION

Thep Siam Co., Ltd. was established on June 15th, 1972, the company has outstanding served all the customers for over four decades.

The factory is fully equipped with imported high technology machines to ensure consistency, safe and high quality production. Production procedures as incorporated under the ISO standards ensure safe environment for workers.

- Formulated for indoor and outdoor application.

Wood stain – water based

- Quick drying
- Translucent, unmasking finish.
- Formulated for indoor and outdoor application.

WOOD STAIN

CREATIVITY IN DEVELOPMENT

Chemical products have become an important part of our daily life. As more and more stronger chemicals are used, the safety of our children and the environment will be affected. In Thep Siam, we believe that this **MUST** not be the way forward.

Our Team of experts led by Dr.Widodo and Miss Meivy Ratanachaithong understands and are committed to this philosophy. Utilizing our ultra-modern R&D laboratories in Suphanburi, Sra Keaw, Petchaboon and the technological advantage and creativity in engineering, our focus is to meet our customers requirements and yet maintain or reduce chemical usage.

This translates to lower prices for our customers and a much friendlier product for the people and the environment.

"Ensuring the safety of mankind and the environment is our goal & pride."

WORLDWIDE
